

Mobile Development Immersive 2

Course Name	Upon completion of this program, the student will be able to:	PLO1: Apply fundamental and intermediate programming principles to develop and optimize applications using Kotlin, Android Studio, and version control techniques.	PLO2: Implement user-friendly and efficient mobile application interfaces using Jetpack Compose.	PLO3: Apply programming languages and tools for Android to create mobile applications.	PLO4: Demonstrate the use of testing and debugging in mobile applications to ensure functionality and performance.	applications on app stores
MDI2 101: INTRODUCTION TO ANDROID DEVELOPMENT						
Describe the Android ecosystem and its components, including Android devices, Google Play Store, and the role of the Android operating system in mobile development.	X = See key below	P, RQ,WE, and FE		P, WE, and FE		
	IRM	1		I		
Demonstrate key features of Android Studio, demonstrating the ability	X = See key below	P, RA, WE and FE	P, WE, and FE	P, WE, and FE		
to use the design editor for basic user interface design.	IRM	I	1	1		
MDI2 102: PROGRAMMING FUNDAMENTALS - INTRODUCTORY						
Apply programming fundamentals by writing programs that demonstrate the correct use of variables, data types, and control structures in the Kotlin	X = See key below	P, RA, WE and FE	P, WE, and FE	P, WE, and FE		
language.	IRM	1	1	1		
Use object-oriented principles by applying basic concepts like class	X = See key below	P, WE, and FE		P, WE, and FE		
creation and object instantiation to develop small programs.	IRM	1		I		
Explain the fundamental concept of declarative programming techniques and explain how they differ from imperative approaches in practical	X = See key below	P, RQ,WE, and FE		P, WE, and FE		
applications.	IRM	I		I		
MDI2 103: PROGRAMMING FUNDAMENTALS - INTERMEDIATE						
Use data structures such as arrays and dictionaries to store, organize, and manipulate data in a program.	X = See key below	P, RA, WE and FE	P, WE, and FE	P, WE, and FE		
	IRM V = See key below	R P, RQ,WE, and FE	R	R P, WE, and FE		
Explain object-oriented principles, including inheritance, polymorphism, and encapsulation, to build reusable and modular code.	X = See key below IRM	R		r, we, and re		
Identify declarative programming concepts to create more concise and	X = See key below	P, RA,WE, and FE		P, WE, and FE		
readable code, contrasting it with imperative programming techniques.	IRM	R		R		
MDI2 104: PRINCIPLES OF UX/UI FOR ANDROID						
Apply Google's Material Design principles to create functional and visually	X = See key below	P, RA, WE and FE	P, RA, WE and FE	P, WE, and FE		
appealing user interfaces for Android applications.	IRM	1	1	I		
Demonstrate appropriate design of effective layout, navigation, and content	X = See key below	P, RA,WE, and FE	P, WE, and FE	P, RA,WE, and FE		
organization.	IRM	ı	1	I		
Implement interactive prototypes using any industry-standard tool,	X = See key below	P, RQ,WE, and FE	P, RQ,WE, and FE	P, WE, and FE		
simulating user interactions and flows for Android apps.	IRM	I	I	I		
MDI2 105: IMPLEMENTATION OF UX/UI FOR ANDROID						
Apply UI/UX principles to create user interfaces for Android apps based on wireframes and mockups, adhering to Google's Material Design principles.	X = See key below IRM	P, RQ,WE, and FE	P, WE, and FE	P, WE, and FE		
	X = See key below	P, WE, and FE	P, RQ,WE, and FE	P, WE, and FE		
Apply interactive prototype designs into fully functional, responsive Android app interfaces using Android Studio and XML.	IRM	r, we, and re	r,nq,wE,and rE	r, we, and re		
MDI2 106: IMPLEMENTATION OF ADVANCED UI/UX FOR ANDROID		·	·	·		
Apply advanced, dynamic UI components that adapt to various device types	X = See key below	P, RA,WE, and FE	P, RA, WE and FE	P, WE, and FE		
and screen sizes using Android's constraint and motion layouts.	IRM	R	R	R		
Identify complex animations and transitions that enhance the user	X = See key below		P, RQ,WE, and FE	P, WE, and FE	P, WE, and FE	
experience while maintaining app performance.	IRM		R	R	I	
Apply custom design requirements and apply standard UI principles to build	X = See key below	P, RQ, WE, and FE	P, RA, WE and FE	P, WE, and FE		
unique, non-standard Android components.	IRM	R	R	R		
MDI2 107: TESTING AND DEBUGGING FOR ANDROID						
Implement unit, integration, and UI tests using Android's testing frameworks	X = See key below		P, RA, WE, and FE	P, WE, and FE	P, RA, WE, and FE	
to ensure app functionality and performance.	IRM		I	1	ļ	

	v a		7	B 11/5 1.55	5 1115 155	
Use automated UI testing tools like Espresso to simulate user interactions and validate app behavior.	X = See key below		P, WE, and FE	P, WE, and FE	P, WE, and FE	
	IRM		I	I	I	
Identify performance bottlenecks and apply optimization techniques to improve app performance and stability.	X = See key below		P, RQ, WE and FE	P, WE, and FE	RQ, P, WE, and FE	
, ,,,	IRM		I	I	I	
MDI2 108: DATA PERSISTENCE FOR ANDROID						
Implement data storage solutions using Android's built-in mechanisms, including SharedPreferences, SQLite, and the Room Persistence Library.	X = See key below	P, WE, and FE		P, WE, and FE	P, RA, WE and FE	
	IRM	1				
	X = See key below	P, WE, and FE		P, WE, and FE	P, WE and FE	
<u>'</u>	IRM			I	I	
Examine data synchronization challenges between offline and online states, ensuring data consistency.	X = See key below	P, RQ, WE, and FE		P, RQ, WE and FE	P, WE and FE	
	IRM			l	I	
MDI2 109: NETWORKING AND WEB SERVICES FOR ANDROID				T	1	
Implement network requests and data exchange using libraries like Retrofit, OkHttp, or Volley within Android applications.	X = See key below	P, RQ, WE, and FE		P, RQ, WE, and FE	P, RQ, WE, and FE	
OKHLLP, or volley within Android applications.	IRM	l l		I	I	
Apply RESTful API principles to interact with web services, including	X = See key below	P, RQ, WE, and FE		P, RQ, WE, and FE	P, RQ, WE, and FE	
fetching, sending, and updating data.	IRM			l l	I	
Use asynchronous programming techniques, such as Kotlin Coroutines and	X = See key below	P, RA, WE, and FE		P,WE, and FE	P,WE, and FE	
AsyncTask, to manage network operations efficiently.	IRM	I		I	I	
MDI2 110: MOBILE APPLICATION DEVICE SENSORS - INTRODUCTORY						
Apply techniques for collecting and processing real-time sensor data in	X = See key below	P, RA, WE, and FE		P,WE, and FE	P, RQ, WE, and FE	
Android applications.	IRM	l		I	I	
Use GPS and location-based services to create location-aware features.	X = See key below	P, RA, WE, and FE		P,WE, and FE	P, RQ, WE, and FE	
	IRM	ı		I	I	
MDI2 111: MOBILE APPLICATION DEVICE SENSORS - INTERMEDIATE			T	1		
Use multi-sensor functionality in Android applications, integrating data from	X = See key below	P, RQ, WE, and FE		P, WE, and FE	P, WE, and FE	
accelerometers, gyroscopes, magnetometers, and environmental sensors.	IRM	R		R	R	
Apply sensor fusion techniques to combine multiple sensor data for enriched	X = See key below					
		P, WE, and FE		P, WE, and FE	P, RQ, WE, and FE	
application functionality.	IRM	R		R	P, RQ, WE, and FE	
application functionality. Use real-time data visualization techniques to dynamically display sensor	IRM X = See key below	R P, WE, and FE	P, WE, and FE	R P, WE, and FE		
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications.	IRM	R	P, WE, and FE	R		
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY	IRM X = See key below IRM	R P, WE, and FE R	R	R P,WE, and FE R		
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and	IRM X = See key below IRM X = See key below	R P, WE, and FE	R P, RA, WE, and FE	R P, WE, and FE		
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns.	IRM X = See key below IRM X = See key below IRM	R P, WE, and FE R P. RA, WE, and FE	R	R P, WE, and FE R P, WE, and FE		
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns. Use Android Wear OS features to develop applications for smartwatches and	IRM X = See key below IRM X = See key below IRM X = See key below X = See key below	R P, WE, and FE R	R P, RA, WE, and FE	R P,WE, and FE R		P, RQ, WE, and FE
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns. Use Android Wear OS features to develop applications for smartwatches and other wearable devices.	IRM X = See key below IRM	R P, WE, and FE R P. RA, WE, and FE I P, RQ, WE and FE	R P, RA, WE, and FE	R P,WE, and FE R P,WE, and FE I P,WE, and FE I I P,WE, and FE	R	P, RQ, WE, and FE
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns. Use Android Wear OS features to develop applications for smartwatches and other wearable devices. Recognize wearable sensors to track health and fitness data, integrating it	IRM X = See key below	R P, WE, and FE R P. RA, WE, and FE	R P, RA, WE, and FE	R P, WE, and FE R P, WE, and FE I P, WE, and FE I P, WE, and FE I P, WE, and FE		P, RQ, WE, and FE
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns. Use Android Wear OS features to develop applications for smartwatches and other wearable devices. Recognize wearable sensors to track health and fitness data, integrating it into wearable applications.	IRM X = See key below IRM	R P, WE, and FE R P. RA, WE, and FE I P, RQ, WE and FE	R P, RA, WE, and FE	R P,WE, and FE R P,WE, and FE I P,WE, and FE I I P,WE, and FE	R	P, RQ, WE, and FE
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns. Use Android Wear OS features to develop applications for smartwatches and other wearable devices. Recognize wearable sensors to track health and fitness data, integrating it into wearable applications. MDI2 113: MOBILE APPLICATIONS FOR WEARABLES - INTERMEDIATE	IRM X = See key below IRM	R P, WE, and FE R P. RA, WE, and FE I P, RQ, WE and FE I P, WE, and FE	R P, RA, WE, and FE	R P,WE, and FE R P,WE, and FE I P,WE, and FE I P,WE, and FE I P,WE, and FE	P, RQ, WE, and FE	1
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns. Use Android Wear OS features to develop applications for smartwatches and other wearable devices. Recognize wearable sensors to track health and fitness data, integrating it into wearable applications. MDI2 113: MOBILE APPLICATIONS FOR WEARABLES - INTERMEDIATE Apply advanced wearable applications that support multi-device	IRM X = See key below IRM	R P, WE, and FE R P. RA, WE, and FE I P, RQ, WE and FE I P, WE, and FE I P, WE, and FE	R P, RA, WE, and FE	R P,WE, and FE R P,WE, and FE I P,WE, and FE I P,WE, and FE I P,WE, and FE I P,WE, and FE	P, RQ, WE, and FE I P, RQ, WE and FE	I P, WE, and FE
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns. Use Android Wear OS features to develop applications for smartwatches and other wearable devices. Recognize wearable sensors to track health and fitness data, integrating it into wearable applications. MDI2 113: MOBILE APPLICATIONS FOR WEARABLES - INTERMEDIATE Apply advanced wearable applications that support multi-device synchronization and real-time data sharing.	IRM X = See key below IRM	R P, WE, and FE R P. RA, WE, and FE I P, RQ, WE and FE I P, WE, and FE I P, WE, and FE R	R P, RA, WE, and FE	R P,WE, and FE R P,WE, and FE I P,WE, and FE I P,WE, and FE I P,WE, and FE R	P, RQ, WE, and FE I P, RQ, WE and FE R	1
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns. Use Android Wear OS features to develop applications for smartwatches and other wearable devices. Recognize wearable sensors to track health and fitness data, integrating it into wearable applications. MDI2 113: MOBILE APPLICATIONS FOR WEARABLES - INTERMEDIATE Apply advanced wearable applications that support multi-device synchronization and real-time data sharing. Use custom sensors and advanced health tracking features within Android	IRM X = See key below	R P, WE, and FE R P. RA, WE, and FE I P, RQ, WE and FE I P, WE, and FE I P, WE, and FE R P, RQ, WE and FE	R P, RA, WE, and FE	R P,WE, and FE R P,WE, and FE I P,WE, and FE I P,WE, and FE I P,WE, and FE R P,WE, and FE	P, RQ, WE, and FE I P, RQ, WE and FE R P, WE, and FE	I P, WE, and FE
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns. Use Android Wear OS features to develop applications for smartwatches and other wearable devices. Recognize wearable sensors to track health and fitness data, integrating it into wearable applications. MDI2 113: MOBILE APPLICATIONS FOR WEARABLES - INTERMEDIATE Apply advanced wearable applications that support multi-device synchronization and real-time data sharing.	IRM X = See key below IRM	R P, WE, and FE R P. RA, WE, and FE I P, RQ, WE and FE I P, WE, and FE I P, WE, and FE R P, RQ, WE and FE R R R, RA, WE, and FE	R P, RA, WE, and FE	R P,WE, and FE R P,WE, and FE I P,WE, and FE I P,WE, and FE I P,WE, and FE R P,WE, and FE R R P,WE, and FE	P, RQ, WE, and FE I P, RQ, WE and FE R P, WE, and FE R	I P, WE, and FE
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns. Use Android Wear OS features to develop applications for smartwatches and other wearable devices. Recognize wearable sensors to track health and fitness data, integrating it into wearable applications. MDI2 113: MOBILE APPLICATIONS FOR WEARABLES - INTERMEDIATE Apply advanced wearable applications that support multi-device synchronization and real-time data sharing. Use custom sensors and advanced health tracking features within Android	IRM X = See key below	R P, WE, and FE R P, RA, WE, and FE I P, RQ, WE and FE I P, WE, and FE I P, WE, and FE R P, RA, WE, and FE R P, RA, WE, and FE R P, WE, and FE	R P, RA, WE, and FE	R P,WE, and FE R P,WE, and FE I P,WE, and FE I P,WE, and FE I P,WE, and FE R P,WE, and FE R P,WE, and FE R P,WE, and FE	P, RQ, WE, and FE I P, RQ, WE and FE R P, WE, and FE R P, WE, and FE	I P, WE, and FE
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns. Use Android Wear OS features to develop applications for smartwatches and other wearable devices. Recognize wearable sensors to track health and fitness data, integrating it into wearable applications. MDI2 113: MOBILE APPLICATIONS FOR WEARABLES - INTERMEDIATE Apply advanced wearable applications that support multi-device synchronization and real-time data sharing. Use custom sensors and advanced health tracking features within Android wearable applications. Apply wearable app functionality by utilizing third-party APIs and services.	IRM X = See key below IRM	R P, WE, and FE R P. RA, WE, and FE I P, RQ, WE and FE I P, WE, and FE I P, WE, and FE R P, RQ, WE and FE R R R, RA, WE, and FE	R P, RA, WE, and FE	R P,WE, and FE R P,WE, and FE I P,WE, and FE I P,WE, and FE I P,WE, and FE R P,WE, and FE R R P,WE, and FE	P, RQ, WE, and FE I P, RQ, WE and FE R P, WE, and FE R	I P, WE, and FE
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns. Use Android Wear OS features to develop applications for smartwatches and other wearable devices. Recognize wearable sensors to track health and fitness data, integrating it into wearable applications. MDI2 113: MOBILE APPLICATIONS FOR WEARABLES - INTERMEDIATE Apply advanced wearable applications that support multi-device synchronization and real-time data sharing. Use custom sensors and advanced health tracking features within Android wearable applications. Apply wearable app functionality by utilizing third-party APIs and services. MDI2 114: ANDROID TABLET DEVELOPMENT	IRM X = See key below IRM	R P, WE, and FE R P, RA, WE, and FE I P, RQ, WE and FE I P, WE, and FE I P, WE, and FE R P, RQ, WE and FE R P, RA, WE, and FE R P, WE, and FE R P, WE, and FE	R P, RA, WE, and FE	R P,WE, and FE R P,WE, and FE I P,WE, and FE I P,WE, and FE I P,WE, and FE R P,WE, and FE R P,WE, and FE R P,WE, and FE R P,WE, and FE	P, RQ, WE, and FE I P, RQ, WE and FE R P, WE, and FE R P, WE, and FE R P, WE, and FE	I P, WE, and FE
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns. Use Android Wear OS features to develop applications for smartwatches and other wearable devices. Recognize wearable sensors to track health and fitness data, integrating it into wearable applications. MDI2 113: MOBILE APPLICATIONS FOR WEARABLES - INTERMEDIATE Apply advanced wearable applications that support multi-device synchronization and real-time data sharing. Use custom sensors and advanced health tracking features within Android wearable applications. Apply wearable app functionality by utilizing third-party APIs and services. MDI2 114: ANDROID TABLET DEVELOPMENT Apply techniques to create multi-pane user interfaces that enhance the	IRM X = See key below IRM	R P, WE, and FE R P, RA, WE, and FE I P, RQ, WE and FE I P, WE, and FE I P, WE, and FE R P, RA, WE, and FE R P, RA, WE, and FE R P, WE, and FE	R P, RA, WE, and FE	R P, WE, and FE R P, WE, and FE I P, WE, and FE I P, WE, and FE I P, WE, and FE R P, WE, and FE	P, RQ, WE, and FE I P, RQ, WE and FE R P, WE, and FE R P, WE, and FE R P, WE, and FE	I P, WE, and FE
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns. Use Android Wear OS features to develop applications for smartwatches and other wearable devices. Recognize wearable sensors to track health and fitness data, integrating it into wearable applications. MDI2 113: MOBILE APPLICATIONS FOR WEARABLES - INTERMEDIATE Apply advanced wearable applications that support multi-device synchronization and real-time data sharing. Use custom sensors and advanced health tracking features within Android wearable applications. Apply wearable app functionality by utilizing third-party APIs and services. MDI2 114: ANDROID TABLET DEVELOPMENT Apply techniques to create multi-pane user interfaces that enhance the user experience on Android tablets.	IRM X = See key below IRM	R P, WE, and FE R P, RA, WE, and FE I P, RQ, WE and FE I P, WE, and FE I P, RQ, WE and FE R P, RA, WE, and FE R P, RA, WE, and FE R P, WE, and FE R P, WE, and FE R P, WE, and FE	R P, RA, WE, and FE	R P,WE, and FE R P,WE, and FE I P,WE, and FE I P,WE, and FE I P,WE, and FE R P,WE, and FE R P,WE, and FE R P,WE, and FE R P,WE, and FE	P, RQ, WE, and FE I P, RQ, WE and FE R P, WE, and FE R P, WE, and FE R P, WE, and FE	I P, WE, and FE
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns. Use Android Wear OS features to develop applications for smartwatches and other wearable devices. Recognize wearable sensors to track health and fitness data, integrating it into wearable applications. MDI2 113: MOBILE APPLICATIONS FOR WEARABLES - INTERMEDIATE Apply advanced wearable applications that support multi-device synchronization and real-time data sharing. Use custom sensors and advanced health tracking features within Android wearable applications. Apply wearable app functionality by utilizing third-party APIs and services. MDI2 114: ANDROID TABLET DEVELOPMENT Apply techniques to create multi-pane user interfaces that enhance the user experience on Android tablets. Use Android tablet-specific features such as drag-and-drop and multi-	IRM X = See key below IRM	R P, WE, and FE R P, RA, WE, and FE I P, RQ, WE and FE I P, WE, and FE I P, WE, and FE R P, RQ, WE and FE R P, RA, WE, and FE R P, WE, and FE R P, WE, and FE	R P, RA, WE, and FE	R P, WE, and FE R P, WE, and FE I P, WE, and FE I P, WE, and FE I P, WE, and FE R P, WE, and FE	P, RQ, WE, and FE I P, RQ, WE and FE R P, WE, and FE R P, WE, and FE R P, WE, and FE I P, RA, WE, and FE	I P, WE, and FE
application functionality. Use real-time data visualization techniques to dynamically display sensor data within Android applications. MDI2 112: MOBILE APPLICATIONS FOR WEARABLES - INTRODUCTORY Apply wearable-specific user interfaces optimized for smaller screens and unique interaction patterns. Use Android Wear OS features to develop applications for smartwatches and other wearable devices. Recognize wearable sensors to track health and fitness data, integrating it into wearable applications. MDI2 113: MOBILE APPLICATIONS FOR WEARABLES - INTERMEDIATE Apply advanced wearable applications that support multi-device synchronization and real-time data sharing. Use custom sensors and advanced health tracking features within Android wearable applications. Apply wearable app functionality by utilizing third-party APIs and services. MDI2 114: ANDROID TABLET DEVELOPMENT Apply techniques to create multi-pane user interfaces that enhance the user experience on Android tablets.	IRM X = See key below IRM	R P, WE, and FE R P, RA, WE, and FE I P, RQ, WE and FE I P, WE, and FE I P, RQ, WE and FE R P, RA, WE, and FE R P, RA, WE, and FE R P, WE, and FE R P, WE, and FE R P, WE, and FE	R P, RA, WE, and FE	R P,WE, and FE R P,WE, and FE I P,WE, and FE I P,WE, and FE I P,WE, and FE R P,WE, and FE R P,WE, and FE R P,WE, and FE R P,WE, and FE	P, RQ, WE, and FE I P, RQ, WE and FE R P, WE, and FE R P, WE, and FE R P, WE, and FE	I P, WE, and FE

Apply localization features in Android applications to support multiple	X = See key below	P, WE, and FE		P, WE, and FE	P, WE, and FE	P, WE, and FE
languages and regions.	IRM	1		ı	ı	ı
Apply best practices for translating app content, including text, dates,	X = See key below	P, RQ, WE, and FE		P, WE, and FE	P, RQ, WE, and FE	P, WE, and FE
numbers, and currencies, for different locales.	IRM	I I		1	1	1
Use Android frameworks to manage right-to-left (RTL) layouts and other region-specific UI elements.	X = See key below		P, RA, WE, and FE	P, WE, and FE	P, WE, and FE	
	IRM		Į.	I	I	
MDI2 116: DEPLOYMENT AND GOOGLE STORE SUBMISSION						
Apply the process of preparing Android apps for release, including signing APKs and generating app bundles. Use Google Play Store guidelines and policies to ensure compliance during the app submission process.	X = See key below	P, WE, RQ, WE, and FE		P, WE, and FE	P, RQ, WE, and FE	P, RQ, WE, and FE
	IRM	R		R	R	1
	X = See key below	P, WE, RA, and FE		P, WE, and FE	P, WE, and FE	P, RQ, WE, and FE
	IRM	R		R	R	1
MDI2 117: ANDROID AUTOMATED TESTING						
Apply automated unit, integration, and UI tests using Android testing	X = See key below	P, RQ, WE and FE		P, WE, and FE	P, RQ, WE and FE	
frameworks such as JUnit and Espresso.	IRM	R		R	R	
Apply test-driven development (TDD) techniques to improve app	X = See key below		P, RA, WE, and FE	P, WE, and FE	P, RA, WE and FE	
functionality and maintainability.	IRM		R	R	R	
Use continuous integration (CI) tools to automate the testing process and	X = See key below	P, RA, WE, and FE		P, WE, and FE	P, WE and FE	
ensure consistent code quality.	IRM	R		R	R	
MDI2 118: CAPSTONE – PLANNING AND DESIGN						
Identify the objectives and scope of the capstone project.	X = See key below	P, RA, WE, and FE		P, WE, and FE		P, WE, and FE
tentify the objectives and scope of the capstone project.	IRM	R		R		R
Analyze the target audience and user needs for the application.	X = See key below		P, RQ, WE and FE	P, WE, and FE		P, WE, and FE
Analyze the target addrence and user needs for the application.	IRM		R	R		R
Create wireframes and prototypes, explaining the functional and technical	X = See key below	P, RQ, WE, and FE	P, RQ, WE and FE	P, WE, and FE	P, WE and FE	
requirements of the proposed application.	IRM	R	R	R	R	
MDI2 119: CAPSTONE - DEVELOPMENT PHASE 1						
Use Kotlin programming concepts to develop core application features.	X = See key below	P, RA, WE, and FE	P, WE, and FE	P, WE, and FE	P, RQ, WE and FE	
ose rotan programming concepts to develop core application reactives.	IRM	R	R	R	R	
Integrate user interface designs into the application using Jetpack	X = See key below		P, RQ, WE and FE	P, WE, and FE		
Compose.	IRM		R	R		
Implement data persistence methods suitable for the application.	X = See key below	P, RA, WE, and FE		P, WE, and FE	P, RQ, WE and FE	P, WE, and FE
miponioni data possiciono metrodo cartable for the apprioditioni	IRM	R		R	R	R
MDI2 120: CAPSTONE - DEVELOPMENT PHASE 2						
Use advanced Kotlin programming techniques to enhance application	X = See key below	P, RA, RQ, WE and FE	P, RQ, WE and FE	P, WE, and FE	P, RQ, WE and FE	P, WE, and FE
features.	IRM	М	М	М	М	М
Apply methods for optimizing the application's performance and efficiency.	X = See key below	P, RA, WE, and FE	P, RQ, WE and FE	P, WE, and FE	P, WE and FE	P, RQ, WE, and FE
spanneng and approaches a special manifold and animology.	IRM	М	М	М	М	М
Resolve bugs through comprehensive testing and debugging.	X = See key below	P, RA,WE, and FE	P, WE, and FE	P, WE, and FE	P, RA, RQ, WE and FE	P, WE, and FE
